

# Research and Development

Can I make a claim?  
More than likely, YES...

In simple terms, a claim may be made by any business that has had to create something that is not readily available on the market. You may have researched into creating/building/improving something to complete the job in hand.

So, get your thinking hats on, as we may be able to help you!

**WE CAN OFFER YOU A FREE 30 MINUTE ASSESSMENT TO IDENTIFY IF YOU WILL QUALIFY.**

**CALL US NOW TO ARRANGE AN APPOINTMENT.**

Please note, we reserve the right to say if a claim is not worth pursuing.

## How your claim will work?

### RESEARCH & DEVELOPMENT ASSESSMENT

We will conduct extensive research, having contacted you, to ensure we have all the correct information to begin your claim.

### PUTTING YOUR CLAIM TOGETHER

We will put together your claim including providing a detailed report if your claim is substantial. The report will show your activities, the costs and the calculation of your claim. If at any time we feel a claim is not warranted, there will be no fee from ourselves.

### APPROVAL AND SUBMISSION

You will receive the claim for approval via our online portal. When you are happy with it, if you are an existing client of Nigel Ricks & Company Ltd we will submit it to HMRC. If you use another accountant we will supply all the information to them so they can submit the claim on your behalf.

### RECEIVING YOUR PAYMENT

Any monies due to you can either be claimed by a reduction to your Corporation Tax bill or you may receive the cash alternative paid directly into your bank account.

## OUR FEES

Our fees for Research & Development claims are competitive.

We charge a percentage of the monies received back/saved (with a minimum fee of £750 + VAT)

What have you got to lose?

We only invoice you once the claim has been settled and you have received the monies from the government.

All work is subject to our standard Engagement Letter.
